

ManageEngine Endpoint Central Cloud — Security Edition

Windows Operations SOP

Scope: Windows 10 / Windows 11 endpoints

Edition: Cloud + Security Edition

Version: 2.0

1. Admin

Console Access

1. Open Edge or Chrome. Navigate to the Endpoint Central Cloud console.
2. Authenticate (SSO or local account with MFA).
3. Verify dashboard loads with correct tenant.

Role-Based Access

Assign roles using least-privilege:

- **Super Admin:** Full access. Limit to 2-3 users maximum.
- **Admin:** Manage agents, configurations, patches.
- **Technician:** View inventory, deploy software, remote control.
- **Auditor:** Read-only for compliance.

To add a user: Admin → User Administration → Add User → assign role and scope.

Hardening

- Enable MFA for all admin accounts.
 - Remove inactive admins quarterly.
 - Enable audit logging.
 - Set session timeout to 15-30 minutes.
-

2. Agent (Windows)

Installation

Manual: Download agent from Agent → Download Agent (Windows, x64). Run as Administrator.

Automated:

```
msiexec /i ManageEngineAgent.msi /qn SERVERIP=<CLOUD_URL> SERVERPORT=443
```

Via imaging: Include in golden image post-sysprep or deploy via OS Deployment task sequence.

Health Validation

1. On endpoint: Services → ManageEngine Endpoint Central Agent → Running.
 2. In console: Agent → Computers → last contact < 30 minutes.
 3. Offline > 24 hours → see Troubleshooting (Section 16).
-

3. Inventory

1. Navigate to Inventory → Computers. Select a device.
 2. View: OS version, installed software, hardware, logged-in users.
 3. On-demand scan: Select device → Actions → Scan Now.
 4. Dynamic groups: Inventory → Custom Groups → define criteria (e.g., OS build < threshold).
-

4. Configurations

1. Navigate to Configurations → Add Configuration.
 2. Select type (Security / System / User), configure settings.
 3. Name using a standard convention (e.g., **SEC-DisableUSB-v1**).
 4. Deploy to target devices or groups. Set schedule (Immediate / Maintenance Window).
 5. Monitor: Configurations → Deployment Status.
-

5. Threats & Patches

Patch Scan

Navigate to Threats & Patches → Scan Systems. Filter results by severity.

Deployment

1. Select missing patches → Deploy.
2. Use a staged approach: test ring first (48-hour soak), then production.
3. Schedule during maintenance windows when possible.
4. Monitor: Deployment Status.

Third-Party Patching

Threats & Patches → Third-Party Updates. Same staged deployment approach.

Declining Patches

Select patch → Decline. Document the reason. Review declined patches monthly.

6. Software Deployment

1. Software Deployment → Add Package (EXE, MSI, or Script).
 2. Upload installer and configure silent switches.
 3. Deploy to targets. Monitor status.
-

7. OS Deployment

1. Build reference machine (see Golden Image Runbook).
 2. Sysprep and shut down.
 3. Capture via OS Deployment → Capture Image.
 4. Deploy: select image, target machines, enable new SID generation, configure post-deploy tasks.
-

8. Mobile Device Management (Windows)

1. Enrollment: MDM → Enrollment → Windows → generate enrollment URL.
 2. On device: Settings → Accounts → Access work or school → Enroll.
 3. Compliance policies: encryption, PIN requirements, OS version minimums.
-

9. Browsers

1. Browsers → Managed Browsers → view installed browsers and versions.
 2. Set policies: homepage, default search, extension allow/block lists.
-

10. BitLocker Management

1. Enable: BitLocker → Manage Encryption → select targets → Enable.
 2. Choose protector: TPM only / TPM + PIN.
 3. Recovery: BitLocker → Recovery Keys → search by hostname.
-

11. Application Control

1. Application Control → Policies → create Allow List or Block List.
 2. Add apps by name, hash, publisher, or path.
 3. Privilege management: elevate specific apps without granting admin rights.
-

12. Device Control

1. Device Control → Policies → Block / Read-Only / Allow for removable storage.
 2. Add exceptions by device serial number if needed.
-

13. Tools

- **Remote Control:** Tools → Remote Control → select device → View/Control/File Transfer.
 - **System Manager:** View services, processes, event logs remotely without interrupting the user.
-

14. Reports

- Standard reports: patch compliance, software inventory, agent health, security posture.
 - Schedule reports: Daily / Weekly / Monthly delivery via email.
 - Custom reports: select data source, filters, columns.
-

15. Support

- ManageEngine portal, phone, and email support.
 - Internal escalation tiers should be defined per organization.
-

16. Decision-Tree Troubleshooting

Agent Offline

```
Agent offline in console
■■■ Device powered on and on network?
■   ■■■ NO → Power on / connect → wait 30 min
■   ■■■ YES → Agent service running?
■       ■■■ NO → Start service manually
■       ■   ■■■ Starts → Wait 15 min
■       ■   ■■■ Fails → Check Event Viewer → reinstall agent
■       ■■■ YES (running but offline)
■           ■■■ Can device reach console URL on port 443?
■           ■   ■■■ NO → Firewall/proxy blocking → whitelist URLs
■           ■   ■■■ YES → Is system clock accurate?
■               ■■■ NO → Sync time → restart agent
■               ■   ■■■ YES → Uninstall and reinstall agent
```

Patch Deployment Failure

```
Patch shows "Failed"
■■■ Check failure reason
■   ■■■ "Insufficient disk space" → Free space → retry
■   ■■■ "Reboot pending" → Reboot → retry
■   ■■■ "Download failed" → Check network/proxy → retry
■   ■■■ "Installation failed" → Check CBS.log
■       ■ ■■■ Known bad patch → Decline and document
■       ■ ■■■ Endpoint issue → DISM /RestoreHealth → retry
■       ■ ■■■ "Agent offline" → Fix agent first → retry
```

Software Deployment Failure

```
Package shows "Failed"
■■■ Installer downloaded to endpoint?
■   ■■■ NO → Network/bandwidth issue → retry off-hours
■   ■■■ YES → Check exit code
■       ■■■ 1603 → Permissions, locked files, or missing prerequisites
■       ■■■ 1618 → Another install in progress → wait and retry
■       ■■■ 3010 → Success, reboot required
■       ■■■ Other → Check vendor docs for exit code
```

Configuration Not Applying

```
Config deployed but not effective
■■■ Assigned to correct group/device?
■   ■■■ NO → Reassign
■   ■■■ YES → Agent communicating?
■       ■■■ NO → Fix agent first
■       ■■■ YES → Conflicting GPO?
■           ■■■ YES → GPO wins → resolve conflict
■           ■■■ NO → Force refresh → Agent → Refresh Configurations
```

OS Deployment Failure

```

Image deployment fails
■■■ PXE boots successfully?
■   ■■■ NO → Check BIOS PXE setting, network cable, DHCP
■   ■■■ YES → Image downloads?
■       ■■■ NO → Check server connectivity and image availability
■       ■■■ YES → Fails during apply?
■           ■■■ Driver issue → Add driver pack for hardware model
■           ■■■ Disk partition error → Check disk health
■           ■■■ Post-deploy task fails → Check task sequence logs

```

BitLocker Failure

```

BitLocker won't enable
■■■ TPM present?
■   ■■■ NO → Enable in BIOS or use USB key protector
■   ■■■ YES → TPM ready? (tpm.msc)
■       ■■■ NO → Clear and re-initialize TPM
■       ■■■ YES → Drive partially encrypted?
■           ■■■ YES → Resume or decrypt fully and re-enable
■           ■■■ NO → Check GPO conflicts → manage-bde -status C:

```

17. Maintenance Schedule

Task	Frequency
Patch scan	Weekly (automated)
Critical patch deployment	Within 72 hours of release
Agent health review	Weekly
Inventory audit	Monthly
Configuration review	Monthly
RBAC / access review	Quarterly
Image refresh	Quarterly or after major OS update
Compliance report	Monthly
